Summary

I have total 15+ years of Experience, 7yrs as a software architect, & experience as a full-stack developer. Full-stack experience, helped r learn & build application end-to-end for multiple platforms like Web Window, Android & iOS become the architect.

As a software architect, I built architect from ground & re-engineered existing monolithic products into Microservices application. I recently created a Serverless SaaS architecture for the startup to design, build the idea without worrying about cost & scale.

Also built the lite version of an enterprise application to take the business process into the external application like Salesforce, Sharepoint as

I pay more attention to the security of the application & software to avoid security breaches. Recently found the security bug in medium online publishing platform & reported to the medium team.

- I'm a good problem solver
- I'm an excellent communicator
- I have strong time management skills
- I'm honest
- I'm super determined

Currently work as a Software architect in M-Files, Finland. I came across your job posting which matches my skills & interest. Looking forward to being part of the company.
